

# Young Remarkable Programmers are Wanted in JAPAN!!

## Who are we??

At Casley Consulting, we use cutting edge open-source and cloud technologies, to provide IT consulting services that increase value and reduce costs for our customers.

We are actively using OSS and open-sourced Paas services to break the cycle of vendor lock-in, and by doing this we ensure our customers get the most value out of their IT endeavors.

Moreover, we do business based on the system developed by Michael Porter, CSV. We do not simply aim for economic gains, but we share value with our suppliers, and aim to produce value for society as a whole. By doing this we can provide services that were not previously possible in the IT consulting field.

Always thinking from the stance of the customer and always providing the best IT services, Welcome to Casley Consulting Inc.

## What is Our Personnel Strategies??

We recognize the most important thing is human resource. Especially we are focusing on the engineer's capability.

We are strengthen the Team Casley from 70 to 120 people since 2015. Our service to various client is not only based on the generalized skill like Java and Seasar2 but cutting edge technology. In order to enforce the competence in the new area, we need to involve the remarkable engineers continuously and invest their growth. We are preparing a various opportunity to improve their skills such as training and external seminars.

There are one more thing we think it is important to build ideal team. with cutting-edge technology. We think it is environment that engineers feel comfortable. We don't only impose engineers companies direction but give them chance to achieve their own goals with strong support.

We are supposed to make any effort to continue as the attractive company for engineers.
